Results-driven **Backend Engineer** with extensive experience in designing and implementing **scalable RESTful APIs** and optimizing database interactions. Deep understanding of **microservices architecture**, with a commitment to writing **clean, maintainable, and well-documented code** that adheres to industry best practices.

EDUCATION

Associate's degree Information Technology **Aug 2023 - Jul 2026**
University of Brawijaya **GPA:** 3.93

I pursued my academic journey at the University of Brawijaya, where I earned an Associate's Degree in Information Technology. This comprehensive program equipped me with a solid foundation in various aspects of IT, including programming, networking, and systems analysis. Throughout my studies, I demonstrated a strong commitment to academic excellence, engaging in coursework that merged theoretical knowledge with practical applications.

WORK EXPERIENCE

Backend Developer Intern **Aug 2025 - Jan 2026**
Inagata Technosmith **Malang, East Java**

- Participated in brainstorming sessions and provided innovative solutions to technical challenges, leading to the adoption of new technologies and improved development workflows.
- Conducted a thorough tech stack evaluation, leading to a migration to more efficient technologies.

Software Developer Intern **Jan 2022 - Jul 2022**
CV. ADISATYA IT CONSULTANT **Kediri Regency, East Java, Indonesia**

- Facilitated sprint planning and retrospectives, resulting in a 20% improvement in team velocity and on-time delivery of features.
- Designed and executed a migration plan from a monolithic to a containerized application, achieving a 40% reduction in infrastructure costs and improving deployment speed by 30%.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Vice Head of IT Development **Sep 2023 - Dec 2025**
UMAR (Unit Mahasiswa Masjid Raden Patah) Universitas Brawijaya **Malang, East Java**

Collaborated closely with cross-functional teams to gather requirements, design solutions, and ensure alignment with business objectives.

PROJECTS

Lost and Found Hub **May 2025 - Jun 2025**

Web GIS Application | [Tech Stack: Next JS, Tailwind CSS, Shadcn UI]

Developed a web-based platform designed to help users report and search for lost items in public areas such as campuses, terminals, parks, and other common spaces. The system enables users to create detailed reports of lost or found items, including descriptions, photos, and locations.

Auction UKK **Nov 2022 - Feb 2023**

Capstone Project | [Tech Stack: Laravel, MySQL] ***(Certified Vocational Competency Test Project)***

Developed as part of the Certified Vocational Competency Test (UKK), *Auction UKK* is a web-based auction platform that allows users to register, place bids, and manage products in a simulated online marketplace. The system includes core functionalities such as user authentication, role-based access (admin, seller, bidder), real-time bidding, product listing with images, and auction deadline timers.
